

ATTENTION UFCW LOCAL 7 JBS MEMBERS

Community COVID-19 testing will continue at ISLAND GROVE PARK through Tuesday, April 28, 2020.

The times are 10AM - approximately to 3PM.

The testing is **FREE** and we highly suggest you and any family members who live in your home or in the Greeley community get tested.

As you know, both Kill and Fab run on Monday, April 27, 2020. The company has directed that workers who are sick, should not report to work. If you are sick, have COVID-19 symptoms such as shortness of breath, a cough, or a fever, please follow the company's direction and do not report to work. Make sure you contact HR. If possible, please call in from your cell phone so you have record of the call.

When you report to work, you will have your temperature taken and asked if you have COVID-19 symptoms (a fever, cough, or are having trouble breathing). Please answer the questions truthfully. You may be tested onsite based on your answers or temperature. If you are not asked any questions during the screening process or do not have your temperature taken, please contact your Union Representative immediately.

Please report any safety concerns to your Union Representatives as well as your immediate supervisor. We continue to advocate for priority testing and a safer workplace.
