Inclement Weather Issues

We have heard from many of our members regarding the issues related to the inclement weather event that occurred earlier this week. Local 7 supports all of our members in making things right here! The company's response was incorrect, misdirected, and put many of you in a precarious safety situation.

It pains me greatly the way this was handled. I have made my opinions known to senior leadership, and we have requested a number of ways to try to remedy this situation in terms of pay, attendance records, and other things.

All in Colorado were well aware that staying off the road was the most prudent course of action to take, and we think the company should have heeded this advice.

We will continue to work on this.

Thank you for everything you do, and please feel free to reach out anytime.

In unity,
Nate Bernstein
Director – UFCW Local 7
