

We have been addressing and escalating concerns about message management since the department's inception. While we have made progress at times, management has continued to change workflows and broadened the scope of work to be performed, all while the volume of messages remains unsustainable and unsafe. Management has indicated through its actions that they do not have the power or will to change message management to make it functional.

In order to address the current state and provide guidance on issues key to our members in Message Management, UFCW Local 7 will hold a townhall this Wednesday,

When: April 20, 2022, at 7pm

Who: This meeting is only open to UFCW Local 7 members.
