

Local 7 has been engaging with management in a discussion about optimal staffing and work life balance. We would like to see Urgent Care departments staffed to maintain optimal levels of staffing while providing flexibility for work life balance. One of the options that we would like to ask management to consider is 12-hour shift profiles. We **DO NOT** have agreement from management on this option but would like to see how many local 7 staff would be interested and see how a schedule might look hypothetically.
