

Dear PC and Peds APPs,

We have heard from many of you concerning the new Primary Care APP templates. This volume of patients is not sustainable long term, but we have heard from some of you that it is not sustainable for another week! We outreached senior company leadership and requested an immediate cease and desist of the new template and an immediate reinstatement of the old template.

The company has responded that they have heard no concerns from the APPs -- that no one is complaining to them. The company believes Local 7 is over exaggerating the APP dissatisfaction.

We need you to speak out! There is safety and power in numbers. The more APPs the company hears from the more they will have to take our concerns seriously.

Please email the names below and let KPCO know your thoughts about the new templates. Nothing will change for the APP unless we push to change it!
