

UFCW Local 7 seeks your feedback regarding the outpatient mental health overflow program.

This program was developed in response to an arbitration against the company by Local 7 to address the outsourcing of our work.

We are seeking to know the number of interested employees and in what capacity they work now, so that we can work with management to determine how the program will look into the future. The program is voluntary. The employee decides how many intakes they wish to offer.

Please take part in this short survey:
